VERDICT

FIRST TEAM PLAYER (SHORT-TERM)

Notes: Ahmad Mendes Moreira is a technically gifted, left-footed attacker whose game is built around passing, quick decision-making and chance creation (3 assists and 2.0 key passes per game in his first 5 Super League matches). He finds solutions quickly in tight spaces, combines well and has a wide passing range, from short combinations to long-distance through balls. His main weakness is a poor defensive commitment: he rarely drops to help, does not track runners and is passive when defending crosses. He also protests frequently to referees (2 yellow cards in 5 matches). His ideal position is as a creative second striker in a front two, where he is freed from heavy defensive duties. For Kifisia, who lost their main creator this summer, he profiles as an affordable, Greek-league-proven first-team option – final fit to be confirmed against the current squad and game model.

TECHNICAL

- ● **Passing.** His standout attribute. Wide range – short combinations, crosses and high-quality long-distance passes that find runners behind the defensive line.
- ● **Chance Creation.** Very good at creating finishing situations – 2.0 key passes per game and joint top assist provider in the league (3 in 5).
- ● **Ball Affinity & Dribbling.** Skilful and comfortable on the ball; not an explosive dribbler, but beats his man and quickly releases the cross or pass.
- ● **Play in Tight Spaces.** Finds solutions quickly with little space, receiving and building between the lines.
- ● **Ball Security.** Rarely loses possession; protects the ball and looks for solutions without taking excessive risks.
- ● **Set Pieces.** Responsible for his team's crossing set pieces (corners and wide free kicks) – one of his assists came from a corner.
- ● **Weak Foot.** Uses his right foot very little, making his actions more predictable.
- ● **Shooting.** Takes some shots and is not weak in this aspect, but it is not a strength – an attribute to improve.
- ● **Goal Output.** Not a goalscorer – 0 goals this season and a low career rate (3 G in 57 apps at PAS Giannina, 4 G in 31 at AEL).

PHYSICAL

- ● **Strength & Body Use.** Physical player (78 kg) who knows how to use his body to protect the ball.
- ● **Drawing Fouls.** Attracts contact and wins free kicks – 3.2 fouls won per game, relieving pressure and creating set-piece opportunities.
- ● **Availability & Stamina.** Started all 5 league matches and played the full 90 minutes in all three matches observed – partly helped by saving energy, as he rarely drops deep.
- ● **Pace.** Not slow, but not a quick player either – does not rely on speed to beat opponents.
- ● **Age Profile.** 31 years old – best suited to a 1–2 year deal.

MENTAL

- **Decision Speed.** Quick to decide on the ball – comes out of the dribble and immediately finds the cross or the pass.
- **Team-First Mindset.** His focus is collective play – chooses the pass and the combination over individual actions.
- **Resilience.** Overcame high-profile racist abuse in the Netherlands (2019) and has spoken openly about it – strong character.
- **Big Moments.** Scored the goal that sealed Kalamata's promotion in 2025/26 and assisted twice in the historic comeback win vs Volos.
- **Defensive Commitment.** Low willingness to contribute without the ball; rarely drops to help his team-mates.
- **Emotional Control.** Protests frequently against referee decisions. Already 2 yellow cards in the first 5 league matches (vs Panetolikos and Aris).

TACTICAL

- **Inside Movement.** Plays mostly on the left with strong inside tendencies – drifts into central areas and half-spaces to receive and build.
- **Arrival in the Box.** When the ball is on the opposite flank, he frequently appears in finishing zones as an extra attacker.
- **Playmaker Profile.** His greatest virtue – prefers to receive to feet and organise the attack; best suited to a second-striker role in a front two (used alongside the striker in a 5-3-2), but can also play as a left winger or attacking midfielder.
- **Runs in Behind.** Rarely attacks the space behind the defensive line; almost always comes short to receive.
- **Pressing.** Takes part in the press, but without much intensity.
- **Tracking Runners.** Does not consistently follow the opposing full-back's forward runs, which can leave his own full-back exposed in 2v1 situations.
- **Defending Crosses & the Box.** Does not close down crossers enough and is passive when the ball arrives in his zone inside the box.
- **Defensive Consistency.** Shows occasional good defensive actions, but without consistency – defending remains his biggest weakness overall.

AREAS OF IMPROVEMENT

- **Defensive Commitment.** Track runners, drop to support the full-back, press with more intensity and be more aggressive closing down crossers.
- **Right Foot.** Develop the weak foot to become less predictable in 1v1s and in the final pass.
- **Shooting & Goal Output.** Improve shooting and convert his arrivals in the box into more personal goals.
- **Emotional Control.** Reduce protests to referees to avoid unnecessary cards.
